

Addendum # 1, March 29, 2021

Ref: PCSP-PW-2021-03

PURCHASE OF ONE (1) SEWER INSPECTION CAMERA

The following is issued to correct and or provide clarification to the referenced sections.

SPECIFICATION/Section 4.1.a.: reduce push rod length

200' of push rod on reel frame that has 10" wheels or equivalent

SPECIFICATION/Section 4.1.l.: remove tilting camera head

Whereas a tilting camera head to see up service connections is not required, the requirement is hereby deleted.

Clarifications provided on March 23, 2021:

I have a question about the inspection camera tender. Is this supply only of an inspection camera or is this sewer maintenance using an inspection camera?

It would be the supply only of a camera and our crews would use internally
