

SIDEWALK CHALK PAINT

You Will Need:

- ½ cup of cornstarch
- 2/3 cup of water
- Food colouring
- Muffin tray/pan
- Large kids paint brushes

Instructions:

1. In a bowl, mix together water and cornstarch. Stir contents until the cornstarch dissolves.
2. Divide the mixture evenly into the wells of your muffin tray and add food colouring to achieve your desired colour!
3. Once colours are mixed, take the muffin tray (your palette) outside with your paint brushes and start painting the sidewalk! Get creative with your new chalk paint!

Notes & Tips:

- Colours will dry much lighter on the sidewalk than they appear in the tray.
- If chalk paint gets on your child's skin, it washes off easily with soap and water.
